

Marshall's - GREEN CHERRY (BEAN) SEPERATOR

Marshall – Fowler takes great pleasure in introducing “GREEN CHERRY (BEAN) SEPERATOR” machinery which is specially designed for coffee plantations of the coffee world. We took special care while designing to give the Coffee Growers high quality of processed coffee and increased yield factor.

Operation

Green Cherry's (Bean) from good ripe cherry fruits having different specific weights / size by the following mechanical method.

Principle of Working

Ripe cherry fruits are fed through the hopper to the central path and are moved to the left and right side simultaneously. While ripe fruits are separated by the action of gentle squeeze and escapes through the gap between the perforation sheet and the centre roller provided in the machine, unripe fruits are pushed out through a separate outlet. The water requirement is very minimal in this case as water just provides a lubrication effort.

Special Features

- ☛ Position of the machine is between siphon tank and Pulper machine.
- ☛ Steel frame assembled with water control arrangement.
- ☛ Ripe cherry fruit / Green cheery fruit – Individual separate outlet.
- ☛ Pre pulping and without damage the wet parchment.
- ☛ Naturally increases the capacity of your existing pulping.

Technical Specifications

Input Capacity of Ripe Cherry Fruits Kg/Hr.	Power Required in HP / BHP	Nett Weight in Kg	Gross Weight in Kg	Shipping Volume in Cu. Meters
3750 - 4000	7.5 / 10.0	365.00	500.00	2.60

#Specifications are subject to change without Notice.
